

# Series Alaska 350 B Compact

The Alaska 350 B model is a supercompact boat conceived for best transportability on the roof rack. It has been built with a thinner aluminium reduced reinforcements applied with rivets in order to make it the lighter possible. The result is a very light handy aluminium boat which can be easily handled by one person and also an increased stability due to its higher sides.

Together with the Alaska 350 B compact we suggest the boat loading pack which allows you to load the boat on your roof rack alone. We have conceived the Alaska 350 B Explorer pack to a very competitive price.

This is the best solution to be independent solitary fishermen not giving away your secret fishing spots.
